

# DANIELA TOMOE

FRONT-END DEVELOPER

## PROFILE

Hi, I'm **Dani**, a veterinarian that decided to be a programmer. I'm 30 years old and married.

I realized that solving bugs is cooler than treating animals. I've been in the Front-end world for almost **1 and a half years** now and, since then, I completed various courses focusing on JavaScript and specializing in **Angular framework**!

As I've improved my **HTML**, **CSS** and **JavaScript** base well, I'm open to opportunities and feel comfortable in learning a new **framework** if necessary!

## EDUCATION

UNESP  
Veterinary Medicine

Alura  
HTML, CSS and JavaScript

Hora de codar  
HTML and CSS practical application
